I. Aim

The governing body has a duty to ensure arrangements are in place to support pupils with medical conditions. The aim of this policy is to ensure that all pupils with medical conditions, in terms of both physical and mental health, receive appropriate support to allow them to play a full and active role in school life, remain healthy, have full access to education (including school trips and PE), and achieve their academic potential.

The school believes it is important that parents of pupils with medical conditions feel confident that the school provides effective support for their children’s medical conditions, and that pupils feel safe in the school environment.

Some pupils with medical conditions may be classed as disabled under the definition set out in the Equality Act 2010. The school has a duty to comply with the Act in all such cases.

In addition, some pupils with medical conditions may also have SEND and have an EHC plan collating their health, social and SEND provision. For these pupils, the school’s compliance with the DfE’s ‘Special educational needs and disability code of practice: 0 to 25 years’ and the school’s Special Educational Needs and Disabilities (SEND) Policy will ensure compliance with legal duties.

To ensure that the needs of our pupils with medical conditions are fully understood and effectively supported, we consult with health and social care professionals, pupils and their parents.

2. Legislation and guidance

This policy reflects the requirements of the [Education Act 1996](#) and the academy will also follow the guidance provided by our local authority. This policy operates in conjunction with the following school policies:

- Special Educational Needs and Disabilities (SEND) Policy
- Drug and Alcohol Policy
- Complaints Policy
- Equality and Diversity Strategy

- Attendance Policy
- Admissions Policy

3. Roles and responsibilities

The governing body will be responsible for:

- Fulfilling its statutory duties under legislation.
- Ensuring that arrangements are in place to support pupils with medical conditions.
- Ensuring that pupils with medical conditions can access and enjoy the same opportunities as any other pupil at the school.
- Working with the LA, health professionals, commissioners and support services to ensure that pupils with medical conditions receive a full education.
- Ensuring that, following long-term or frequent absence, pupils with medical conditions are reintegrated effectively.
- Ensuring that the focus is on the needs of each pupil and what support is required to support their individual needs.
- Instilling confidence in parents and pupils in the school's ability to provide effective support.
- Ensuring that all members of staff are properly trained to provide the necessary support and are able to access information and other teaching support materials as needed.
- Ensuring that no prospective pupils are denied admission to the school because arrangements for their medical conditions have not been made.
- Ensuring that pupils' health is not put at unnecessary risk. As a result, the board holds the right to not accept a pupil into school at times where it would be detrimental to the health of that pupil or others to do so, such as where the child has an infectious disease.
- Ensuring that policies, plans, procedures and systems are properly and effectively implemented.

The Principal will be responsible for:

- The overall implementation of this policy.
- Ensuring that this policy is effectively implemented with stakeholders.
- Ensuring that all staff are aware of this policy and understand their role in its implementation.
- Ensuring that a sufficient number of staff are trained and available to implement this policy and deliver against all IHCPs, including in emergency situations.
- Considering recruitment needs for the specific purpose of ensuring pupils with medical conditions are properly supported.
- Ensuring that staff are appropriately insured and aware of the insurance arrangements.

The SENCo is responsible for:

- Having overall responsibility for the development of IHCPs.
- Ensuring that staff are appropriately insured and aware of the insurance arrangements.
- Contacting medical professionals where a pupil with a medical condition requires support that has not yet been identified.

Parents will be responsible for:

- Notifying the school if their child has a medical condition.
- Providing the school with sufficient and up-to-date information about their child's medical needs.
- Being involved in the development and review of their child's IHCP.

- Carrying out any agreed actions contained in the IHCP.
- Ensuring that they, or another nominated adult, are contactable at all times and that school is informed immediately of any changes to contact names or numbers.

Pupils will be responsible for:

- Being fully involved in discussions, as age appropriate, about their medical support needs, where applicable.
- Contributing to the development of their IHCP, if they have one, where applicable.
- Being sensitive to the needs of pupils with medical conditions.

School staff will be responsible for:

- Providing support to pupils with medical conditions, where requested, including the administering of medicines, but are not required to do so.
- Taking into account the needs of pupils with medical conditions in their lessons when deciding whether or not to volunteer to administer medication.
- Receiving sufficient training and achieve the required level of competency before taking responsibility for supporting pupils with medical conditions.
- Knowing what to do and responding accordingly when they become aware that a pupil with a medical condition needs help.

Clinical commissioning groups (CCGs) will be responsible for:

- Ensuring that commissioning is responsive to pupils' needs, and that health services are able to cooperate with schools supporting pupils with medical conditions.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Being responsive to LAs and schools looking to improve links between health services and schools.
- Providing clinical support for pupils who have long-term conditions and disabilities.
- Ensuring that commissioning arrangements provide the necessary ongoing support essential to ensuring the safety of vulnerable pupils.

Other healthcare professionals, including GPs and paediatricians, are responsible for:

- Notifying the school nurse when a child has been identified as having a medical condition that will require support at school.
- Providing advice on developing IHCPs.
- Providing support in the school for children with particular conditions, e.g. asthma, diabetes and epilepsy, where required.

Providers of health services are responsible for cooperating with the school, including ensuring communication takes place, liaising with the school nurse and other healthcare professionals, and participating in local outreach training.

The LA will be responsible for:

- Promoting cooperation between relevant partners.
- Making joint commissioning arrangements for EHCP provision for pupils with SEND.
- Providing support, advice, guidance, and suitable training for school staff, ensuring that IHCPs can be effectively delivered.

- Working with the school to ensure that pupils with medical conditions can attend school full-time.

Where a pupil is away from school for 15 days or more (whether consecutively or across a school year), the LA has a duty to make alternative arrangements, as the pupil is unlikely to receive a suitable education in a mainstream school.

4. Admissions

Admissions will be managed in line with the school's Admissions Policy.

No child will be denied admission to the school or prevented from taking up a school place because arrangements for their medical condition have not been made; a child may only be refused admission if it would be detrimental to the health of the child to admit them into the school setting.

The school will not ask, or use any supplementary forms that ask, for details about a child's medical condition during the admission process.

5. Notification procedure

When the school is notified that a pupil has a medical condition that requires support in school, the parent will inform the school. Following this, the school will arrange a meeting with parents, healthcare professionals and the pupil, with a view to discussing the necessity of an IHP, outlined in detail in the IHCPs section of this policy.

The school will not wait for a formal diagnosis before providing support to pupils. Where a pupil's medical condition is unclear, or where there is a difference of opinion concerning what support is required, a judgement will be made by the Vice Principal Inclusion based on all available evidence, including medical evidence and consultation with parents.

For a pupil starting at the school in a September uptake, arrangements will be put in place prior to their introduction and informed by their previous institution. Where a pupil joins the school mid-term or a new diagnosis is received, arrangements will be put in place within two weeks.

6. Staff training and support

Any staff member providing support to a pupil with medical conditions will receive suitable training. Staff will not undertake healthcare procedures or administer medication without appropriate training. Training needs will be assessed by the SENCo through the development and review of IHPs, on an annual basis for all school staff, and when a new staff member arrives.

A first-aid certificate will not constitute appropriate training for supporting pupils with medical conditions.

Through training, staff will have the requisite competency and confidence to support pupils with medical conditions and fulfil the requirements set out in IHPs. Staff will understand the medical conditions they are asked to support, their implications, and any preventative measures that must be taken.

Whole-school awareness training will be carried out on an annual basis for all staff and included in the induction of new staff members.

The SENCo will identify suitable training opportunities that ensure all medical conditions affecting pupils in the school are fully understood, and that staff can recognise difficulties and act quickly in emergency situations.

The parents of pupils with medical conditions will be consulted for specific advice and their views are sought where necessary, but they will not be used as a sole trainer.

Supply teachers will be:

- Provided with access to this policy.
- Informed of all relevant medical conditions of pupils in the class they are providing cover for.
- Covered under the school's insurance arrangements.

7. IHCPs

The school, healthcare professionals and parents agree, based on evidence, whether an IHCP will be required for a pupil, or whether it would be inappropriate or disproportionate to their level of need. If no consensus can be reached, the Vice Principal will make the final decision.

The school, parents and a relevant healthcare professional will work in partnership to create and review IHCPs. Where appropriate, the pupil will also be involved in the process.

IHCPs will include the following information:

- The medical condition, along with its triggers, symptoms, signs and treatments
- The pupil's needs, including medication (dosages, side effects and storage), other treatments, facilities, equipment, access to food and drink (where this is used to manage a condition), dietary requirements, and environmental issues
- The support needed for the pupil's educational, social and emotional needs
- The level of support needed, including in emergencies
- Whether a child can self-manage their medication
- Who will provide the necessary support, including details of the expectations of the role and the training needs required, as well as who will confirm the supporting staff member's proficiency to carry out the role effectively
- Cover arrangements for when the named supporting staff member is unavailable
- Who needs to be made aware of the pupil's condition and the support required
- Arrangements for obtaining written permission from parents for medicine to be administered by school staff or self-administered by the pupil
- Separate arrangements or procedures required during school trips and activities
- Where confidentiality issues are raised by the parents or pupil, the designated individual to be entrusted with information about the pupil's medical condition
- What to do in an emergency, including contact details and contingency arrangements

Where a pupil has an emergency healthcare plan prepared by their lead clinician, this will be used to inform the IHCP.

IHCPs will be easily accessible to those who need to refer to them, but confidentiality will be preserved. IHCPs will be reviewed on at least an annual basis, or when a child's medical circumstances change, whichever is sooner.

Where a pupil has an EHC plan, the IHCP will be linked to it or become part of it. Where a child has SEND but does not have a statement or EHC plan, their SEND will be mentioned in their IHCP.

Where a child is returning from a period of hospital education, alternative provision or home tuition, the school will work with the LA and education provider to ensure that their IHCP identifies the support the child will need to reintegrate.

8. Managing medicines

Medicines will only be administered at school when it would be detrimental to a pupil's health or school attendance not to do so.

Pupils under 16 years old will not be given prescription or non-prescription medicines without their parents' written consent.

Non-prescription medicines may be administered in the following situations:

- When it would be detrimental to the pupil's health not to do so
- When instructed by a medical professional

No pupil under the age of 16 will be given medicine containing aspirin unless prescribed by a doctor. Pain relief medicines will not be administered without first checking when the previous dose was taken, and the maximum dosage allowed.

Parents will be asked to fill out a medicines administration form stating the name of medication to be delivered to their child, the frequency and the dosage for any short-term illness (one week or less). For long-term conditions an IHCP will be required to be filled out.

The school will only accept medicines that are in-date, labelled, in their original container, and contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container. For students carrying their own medication, eg epi-pen, inhaler, a parental consent for the pupil to carry and administer their own medication is needed.

All medicines will be stored safely. Pupils will be informed where their medicines are at all times and will be able to access them immediately, whether in school or attending a school trip or residential visit. When medicines are no longer required, they will be returned to parents for safe disposal.

Sharps boxes will be used for the disposal of needles and other sharps.

Controlled drugs will be stored in a non-portable container and only named staff members will have access; however, these drugs can be easily accessed in an emergency. A record will be kept of the amount of controlled drugs held and any doses administered. Staff may administer a controlled drug to a pupil for whom it has been prescribed, in accordance with the prescriber's instructions.

The school will hold asthma inhalers for emergency use. The inhalers will be stored in the main office.

Records will be kept of all medicines administered to individual pupils, stating what, how and how much medicine was administered, when, and by whom. A record of side effects presented will also be held.

9. Allergens, anaphylaxis and adrenaline auto-injectors (AAIs)

Parents are required to provide the school with up-to-date information relating to their children's allergies, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

The Principal and catering team ensure that all meals meet the requirements of Natasha's Law, i.e. the name of the food and a list with allergens emphasised, e.g. in bold, italics or a different colour on the school website.

Staff members receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

Where a pupil has been prescribed an AAI, this will be written into their IHCP.

A Register of Adrenaline Auto-Injectors (AAIs) will be kept of all the pupils who have been prescribed an AAI to use in the event of anaphylaxis. A copy of this will be held in each classroom

for easy access in the event of an allergic reaction and will be checked as part of initiating the emergency response.

Pupils who have prescribed AAI devices can keep their device in their possession.

Designated staff members will be trained on how to administer an AAI, and the sequence of events to follow when doing so. AAI's will only be administered by these staff members.

In the event of anaphylaxis, a designated staff member will be contacted immediately. Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI. If necessary, other staff members may assist the designated staff members with administering AAI's, e.g. if the pupil needs restraining.

Where a pupil is, or appears to be, having a severe allergic reaction, the emergency services will be contacted even if an AAI device has already been administered.

In the event that an AAI is used, the pupil's parents will be notified that an AAI has been administered and informed whether this was the pupil's or the school's device. Where any AAI's are used, the following information will be recorded on the Adrenaline Auto-Injector (AAI) Record:

- Where and when the reaction took place
- How much medication was given and by whom

AAI's will not be reused and will be disposed of according to manufacturer's guidelines following use.

10. Record keeping

Written records will be kept of all medicines administered to pupils. Proper record keeping will protect both staff and pupils, and provide evidence that agreed procedures have been followed.

11. Emergency procedures

Medical emergencies will be dealt with under the school's emergency procedures.

Where an IHCP is in place, it should detail:

- What constitutes an emergency.
- What to do in an emergency.

Pupils will be informed in general terms of what to do in an emergency, e.g. telling a teacher.

If a pupil needs to be taken to hospital, a member of staff will remain with the pupil until their parents arrive. When transporting pupils with medical conditions to medical facilities, staff members will be informed of the correct postcode and address for use in navigation systems.

12. Day trips, residential visits and sporting activities

Pupils with medical conditions will be supported to participate in school trips, sporting activities and residential visits.

Prior to an activity taking place, the school will conduct a risk assessment to identify what reasonable adjustments should be taken to enable pupils with medical conditions to participate. In addition to a risk assessment, advice will be sought from pupils, parents and relevant medical professionals. The school will arrange for adjustments to be made for all pupils to participate, except where evidence from a clinician, e.g. a GP, indicates that this is not possible.

13. Unacceptable practice

The school will not:

- Assume that pupils with the same condition require the same treatment.
- Prevent pupils from easily accessing their inhalers and medication.
- Ignore the views of the pupil or their parents.
- Ignore medical evidence or opinion.
- Send pupils home frequently for reasons associated with their medical condition, or prevent them from taking part in activities at school, including lunch times, unless this is specified in their IHCP.
- Send an unwell pupil to the medical room or school office alone or with an unsuitable escort.
- Penalise pupils with medical conditions for their attendance record, where the absences relate to their condition.
- Create barriers to pupils participating in school life, including school trips.
- Refuse to allow pupils to eat, drink or use the toilet when they need to in order to manage their condition.

14. Liability and indemnity

The IEB will ensure that appropriate insurance is in place to cover staff providing support to pupils with medical conditions.

The school holds DfE risk protection arrangement (RPA) membership covering liability relating to the administration of medication. The policy has the following requirement:

- Staff must be following the guidance set out in *DfE (2015) Supporting pupils at school with medical conditions*.

All staff providing such support will be provided with access to the insurance policies.

In the event of a claim alleging negligence by a member of staff, civil actions are most likely to be brought against the school, not the individual.

15. Complaints

Parents or pupils wishing to make a complaint concerning the support provided to pupils with medical conditions are required to speak to the school in the first instance. If they are not satisfied with the school's response, they may make a formal complaint via the school's complaints procedures, as outlined in the Complaints Procedures Policy. If the issue remains unresolved, the complainant has the right to make a formal complaint to the DfE.

Parents and pupils are free to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

16. Home-to-school transport

Arranging home-to-school transport for pupils with medical conditions is the responsibility of the LA. Where appropriate, the school will share relevant information to allow the LA to develop appropriate transport plans for pupils with life-threatening conditions.

17. Defibrillators

The school has three SADS UK automated external defibrillator (AED). The AEDs are stored near the entrance doors to the school from reception, the first aid room, and one in the Science office.

All staff members and pupils will be made aware of the AEDs' location and what to do in an emergency. A risk assessment regarding the storage and use of AEDs' at the school will be carried out and reviewed annually.

No training will be needed to use the AED, as voice and/or visual prompts guide the rescuer through the entire process from when the device is first switched on or opened; however, staff members will be trained in cardiopulmonary resuscitation (CPR), as this is an essential part of first-aid and AED use.

The emergency services will always be called where an AED is used or requires using.

Where possible, AEDs will be used in paediatric mode or with paediatric pads for pupils under the age of eight.

Maintenance checks will be undertaken on AEDs on a weekly basis by the Site Manager, who will also keep an up-to-date record of all checks and maintenance work.

18. Monitoring and review

This policy is reviewed on an annual basis by the governing board, school nurse and Principal. Any changes to this policy will be communicated to all staff, parents and relevant stakeholders.

Appendix G - Contacting Emergency Services

To be stored by the phone in the school office

Request an ambulance – dial 999, ask for an ambulance and be ready with the information below.

Speak clearly and slowly, and be ready to repeat information if asked.

- The telephone number: 01476 405200
- Your name.
- Your location: The Avenue, Trent Road, Grantham
- The postcode: NG31 7PX
- The exact location of the individual within the school.
- The name of the individual and a brief description of their symptoms.
- The best entrance to use and where the crew will be met and taken to the individual.
